

## CuWizard™ Rules For Culica®

Variation - Classic

Mode: 2 to 8+ Players

Difficulty: Tricky.

### Rules

Drop 14 pegs of each colour into the Culica® bag. Now each player takes seven pegs from the bag. They're secret so conceal them!

First player puts a peg on the Culica cube.

Players take turns.

Put a peg next to (side-by-side) an existing peg such that your peg does not violate any *CuWizard* (see below).

A *CuWizard* is a straight row of four pegs, each of a different colour, and with two pegs on one face and two on another (see figure, above right).

Can't move? Pick up another peg from the bag.

### To win:

- ✓ Be first to get rid of all your pegs.
- OR –
- ✓ be last to move (when no one else can go).

### Notes

Note that CuWizards may criss-cross in vertical and horizontal directions (not diagonal). So each peg may belong to more than one cuWizard (see figure, right, for an example).

CuWizard is a Culica analogy of SuDoku: there are colours instead of numbers, and CuWizard rows instead of Soduku squares.
